CAREER OBJECTIVE

To obtain new experience and knowledge that will be useful in the near future that is related to my desired job. To be able to contribute my knowledge for the organization's benefit.

DESIGN PROJECT COMPLETED/ RESEARCH

The research aims to determine the effectiveness of using reading materials in the subject of Humanities to enhance the academic performance of senior high school students. The lack of reading materials has been identified as a significant factor that can negatively impact students' academic performance in the subject of Humanities, causing students to find the subject difficult and lose interest in it. The research will use a quasi-experimental design to give pre- and post-tests to grade 11 students to measure the effects of reading materials on their performance in Humanities. The goal of the research is to help students improve their grades in Humanities by providing them with reading materials and to help teachers find better methods for teaching the subject.
